Das Ende Der Nacht- The End of the Night

by Thomas Posch/Anja Freyhoff/Thomas's Uhlmann, Thomas (Hg.)

(Published in German)

This book looks at global light pollution and its consequences. First German-language summary of substantial problematic aspects of the artificial outdoor lights and the effects of their nearly exponential increase for approximately one century. Generally comprehensible representation with current statistics.

With contributions by : Andreas Hänel, Gerhard Eisenbeis, Ommo Hüppop, Christin Borgwardt, Tony Tucker, Kristin Tessmar, Juliane Zantke, Tobias Emperor, Christian Cajochen and the publishers.

Topics include:

History of the artificial lighting –

Light contamination in Central Europe –

Moth and artificial light - Migratory birds and artificial light –

Sea turtles as victims of beach lighting –

Moon light as interval timers for the Meeresfauna –

Artificial light and human health
